ACKNOWLEDGEMENT

I would like to express my greatest appreciation to the all individuals who have helped and supported me throughout the project.

I am thankful to my Internet Programming mam (Dr. Mohammad Faiz) for her ongoing support during the project, from initial advice, and encouragement, which led to the final report of this project.

DESIGN AND SOURCE CODE:-

Conclusion

India being the second largest growing economy with huge consumer class has resulted in online market as one of the biggest pathway for a successful start-up. Everything that was required with large efforts is coming at the fingertips. Baby and child-care products market grew by 14% in current value terms in 2011. There are many advantages also of online shopping for children i.e. the problem of going to different shops for buying different products of children is solved. Everything is available in one place. The size of the market will be high due to high demand for the children essentials and less competition in this field. If implemented and managed properly, it can be one of the leading child care selling E-commerce website in the world market.

From this Project I have learnt the real time applications of HTML and CSS.

This project has been a source to learn and bring our theoretical knowledge to the real-life world.
